Hiring Manager
Druva

Dear Hiring Manager,

I am excited to apply for the Software Engineer position at Druva. With a B.Tech in Computer Science and Engineering from the University of Engineering and Management, Kolkata, and a CGPA of 9.01/10 (till 7th semester), I have a strong academic foundation and practical experience in backend development, cloud technologies, and machine learning.

My projects, including "Phone Suggest," "Charaka," and "Mental Health API," demonstrate my ability to develop high-performance, responsive applications using Python, FastAPI, and Next.js. I am proficient in Unix/Linux and Windows platforms, with hands-on experience in data structures, algorithms using C/C++ and software design principles.

My strong communication and teamwork skills enable me to effectively collaborate across teams and deliver quality software solutions.

I am enthusiastic about Druva's mission to enhance data resilience and am eager to contribute to your innovative SaaS solutions.

Thank you for considering my application. I look forward to discussing how my skills and experiences align with Druva's needs.

Sincerely,

Swastik Dhar
